

Over 2,000 successfully
treated TMJ patients!

Nearly 1 of 2 women between
the ages of 16-65 are suffering
with TMD related symptoms.

"[The splint] gave me my life back; I can talk, chew and sleep with little to no pain, locking, popping, or clicking in my jaw." -Sam K.

"Headaches, neck pain, shoulder and arm pain all combined to hinder my ability to function in simple day to day tasks. After one week of wearing [the splint], my symptoms began to dissipate. Three weeks later, I am happy to say I am pain free!" -Allie M.

"This splint has really helped me in many ways and saved me from having surgery." -BreAnna B.

"[The splint] simply took away my headaches, jaw pain and shoulder pain, and gave me back the feeling of being normal without taking any medicines." -Dorothy K.

"After a few month and couple quick visits I am virtually pain free!" -Kerri C.

"I really wasn't sure if I could be helped. I was wrong and now I am pain free!" -Jennifer K.

"I came in with severe jaw pain and difficulty opening my mouth wide. I would also have ear pain. After wearing the splint as directed I feel so much better. When I open my mouth wide I feel no discomfort." -Carol W.

Migraine?
or TMD?

Bad headaches may not
mean you have migraines.

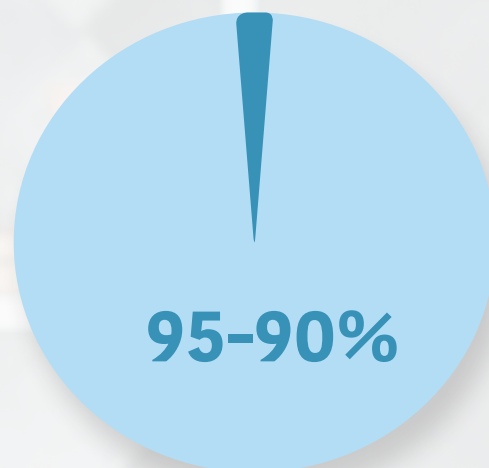

The word “migraine” is commonly used in reference to “bad or recurring headaches.” But there can be other reasons for a “bad headache” that might not be a true migraine headache.

The symptoms of TMD (Temporomandibular Joint Disorder) on the other hand, are very similar to the symptoms of a migraine and are directly caused by inflammation in the TMJ (temporomandibular joint).

Because of the similarities, TMD can be misdiagnosed as such.

Symptoms	Migraine	TMD
Frequent Headaches	X	X
Neck Pain		X
Jaw Pain		X
Tinnitus		X
Vertigo		X
Sensitivity to Light	X	
Shoulder/Arm Pain		X
Earaches		X
Hearing Loss/Fullness		X
Jaw Locking		X
Visual Disturbances	X	X
Face Numbness/Tingling	X	X
Hand Numbness/Tingling		X
Nausea	X	X

95-90% of TMD patients are **successfully treated** using the patented Urbanek Device **without surgery and without medications!**

Dr. Urbanek's TMJ Splint is a small acrylic piece that fits comfortably in the mouth and is uniquely designed to relieve the jaw joint inflammation. It's more than just a dental splint or mouth guard... it's a life changer!
